CES

If you wires sh as the T you. Wh all of yo frame), done:

CES 2008 tour #14 - The Evo system

by Marshall Brain

If you would like to mount your HDTV to the wall the elegant way, with no wires showing, and if you don't mind that the mounting system costs as much as the TV itself (possibly more), then the evo system from Vantage Point is for you. What you get is a aluminum frame system that you bolt to the wall. Then all of your equipment mounts to that frame (or sits on shelves attached to the frame), with all of the wiring behind the frame. It looks like this when you get done:

You design and price the system yourself using a graphical configurator on the web site:

Vantage Point evo
