

## Red Brick Installation Instructions for TV Wall Mounts

Design for your world.™

Red brick material can vary tremendously in quality. The following instructions are a recommendation only. If unsure of installation, we recommend that a knowledgeable and qualified contractor perform the installation. Should any portion of these instructions be unclear, call our consumer service department at 1-800-582-9595, M-F, 8-5 PST. **Installer assumes all responsibility for the integrity of the installation.**

Installer must consider the following:

1. Choice of mounting location.
2. Is the brick of good quality material with good mortar/cement joints or are the bricks loose and cracked?
3. Are there signs of water damage, cracks or crumbling mortar?
4. Do the bricks back up to another room or wall?
5. Always remember **SAFETY FIRST**.

### PROCEDURE FOR RED BRICK

**STEP 1.** Determine desired mounting position of TV wall mount

**STEP 2.** Position the wall plate, avoiding mortar/cement joints between the bricks (if possible).

**STEP 3.** Mark position of holes and drill holes

**STEP 4.** Put metal anchors into the holes. (fill any cracks with epoxy)

**STEP 5.** Put bolts thru holes in wall plate and into anchors and tighten

**STEP 6.** Follow remaining instruction procedures included with the TV mount.

**STEP 7.** Always perform a safety load test before putting TV on the wall mount, to verify the integrity of your installation

### ***RECOMMENDED TOOLS AND HARDWARE***

***Hammer drill***

***Masonry drill bit (the size of the diameter of the anchors)***

***Two piece concrete anchor bolts (metal expandable sleeve and bolt)***

***1/4" x 3" bolt for the 4 hole wall plate and 5/16" x 3" bolt for the 5 hole wall plate***
