The evo system™ mounts flat panel television components onto the wall while freeing up space. The modular frame and track system supports unlimited equipment configurations and extends from the wall, creating a hollow space for wiring without cutting into the wall. The 16" x 16" real wood veneer panels, available in five finishes, allow easy access to wiring while creating a furniture quality appearance. Accessories are available such as tempered glass shelves and speaker mounts to support electronics for installations in rental situations since it easily requires only minor wall repairs. The possibility of same day installation, eliminating the anxiety of committing to built-ins requiring planning and construction time. Great for home entertainment and office equipment, the evo system™ revolutionizes the concept of wall mounting electronic equipment.
